

The Residential Construction Safety Group (ResCon) is an organized team of leaders comprised of safety professionals, government employees and other service providers. Our mission is to increase awareness and improve the safety culture for business owners and safety professionals in the residential construction market through the provision of safety forums, events and support teams in which they can participate. Additionally, the ResCon Safety Group provides regulatory updates, leadership commitment and an atmosphere of sharing and education.

PSE's *Damage Prevention & Safety* presentation is intended to raise the awareness of contractors involved in public improvement projects. The importance of safe work practices when working in or around utility right-of-ways will be discussed. The emphasis will be on electric and natural gas facilities, the one-call system and possible hazards when procedures are not followed or clearances not maintained on the jobsite.

Dennis Smedsrud, Safety and Health Work Practices Consultant, Puget Sound Energy

Dennis Smedsrud is a Safety and Health Work Practices Consultant with Puget Sound Energy (PSE), an electric and natural gas utility located in Bellevue, Washington. For the past 16 of his 28 years he has been responsible for providing occupational health and safety/damage prevention programs for the construction industry and training for first responders on managing electric and natural gas emergencies.
